Dear customer,

As you know, we want to offer you only the best when it comes to handling your pharmaceutical products.

A growing need for storage facilities for pharmaceutical products urged us to expand our logistic centre.

That is why we are proud to announce that we can offer you from now on an additional validated warehouse at the Industrial Zone in **Aalst** that can store 400 pallets cooled (+2°C +8°C) and 1500 pallets ambient (+15°C +25°C).

In order to offer you a complete logistic solution, we can also take care of the Picking & Packing of your **pharmaceuticals**, using our **validated** warehouse management system.

Maintaining at all time the quality of the products we handle, is our main objective.

A guaranteed complete and registered **Cold Chain** from the pickup of the goods to the storage, the **Picking & Packing** and the delivery can vouch for our service level.

Should you wish to receive additional information or an offer for cooled storage and/or picking & packing, don't hesitate to contact us at marketing@dirkraes.be or by telephone at +32 (0)9 280 74 40.
Best regards,

Dirk C. Raes
Managing Director

Evelien Lombaerts
